Latisys Delivers More:

RESILIENT DATA CENTER NETWORK
Built on enterprise-class technology, we deliver your data from our premium network to your collocated or managed hosting services through our redundant transport, routing and switching infrastructure.

PRIVATE CONNECTIVITY
Our Northern Virginia facility is connected to one of the largest network exchange points on the eastern seaboard. By leveraging our highly redundant transport and network infrastructure, we can connect your hosted or collocated environment to a wide range of carriers to support your private connectivity needs.
