

Stay Connected.

Our service offerings include redundant network connectivity options to five diverse network providers. With over 13 Gigabit of Internet capacity and the ability to scale to hundreds of Gigabits almost instantly, as the need arises, we can quickly fulfill your bandwidth needs for any variety of application and network traffic.

Chicago Internet Connection Design

Latisys Blended IP Network:

AboveNet

Leverage our blended IP network, which consists of multi-gigabit connections through diverse IP providers, at any one of our data centers. If you require the ability to connect directly with other telecommunication carriers, we can facilitate that as well, with industry-leading direct-connectivity options.

Latisys Delivers More:

RESILIENT DATA CENTER NETWORK

Built on enterprise-class technology, we deliver your data from our premium network to your collocated or managed hosting services through our redundant transport, routing and switching infrastructure.

PRIVATE CONNECTIVITY

At the Latisys Tier III+ Data Center in Chicago you'll experience one of the most sophisticated, powerful and secure data centers in the country. By leveraging our highly redundant transport and network infrastructure, we can connect your hosted or collocated environment to a wide range of carriers to support your private connectivity needs.
